

# **PARTNERS IN PREVENTION**

## ***Disease Surveillance, Reporting and Control in Massachusetts***

### **An Interactive Web-Based Training (Available June 2004)**

**Sponsored by the Massachusetts Department of Public Health  
And Policy Studies, Inc.**

#### **PURPOSE:**

**Partners in Prevention** is an Free Interactive Web-Based Training offered by The Massachusetts Department of Public Health in collaboration with Policy Studies, Inc to prepare health care providers and public health professionals to respond to infectious disease cases and emergencies by understanding disease surveillance, reporting and control.

#### **COURSE DESCRIPTION:**

This course describes the principals of infectious disease surveillance, reporting and control, the legal and confidentiality requirements, isolation and quarantine and infection control measures.

#### **COURSE FORMAT:**

**Partners in Prevention** is an interactive web-based self-study training course that provides up-to-date information on Massachusetts' infectious disease surveillance, reporting and control, legal and confidentiality requirements, isolation, quarantine and infection control measures. Users can test their knowledge of the material through study questions and case studies presented throughout the program.

#### **THIS COURSE IS APPROPRIATE FOR:**

All those audiences that are mandated reporters, respond to an infectious disease incident, and/or implement isolation and quarantine measures including:

- Public Health Professionals: state and local boards of health: health officers/agents, sanitarians and public health nurses
- Healthcare Providers: physicians, infectious disease specialists, nurses, emergency room staff
- Infection Control Professionals
- Laboratory Professionals
